Summary

Motivated and detail-oriented Computer Scientist with over three years of experience in software development, database

management, IT support, and digital solutions. Proficient in Python (Flask/Django), Flutter, React Native, and modern

database technologies, with a strong ability to troubleshoot technical issues, maintain information systems, and provide reliable

user support. Experienced in developing secure applications, managing data, and implementing technology solutions that

improve efficiency and service delivery. Possesses excellent analytical, communication, and problem-solving skills, with the

ability to work effectively both independently and as part of a team. Committed to continuous learning, professionalism, and

leveraging technology to support healthcare operations and enhance organizational performance.

Experience

Internship & Graduate | IT Technician

Tenri Group Of Hospitals, Embu , Kenya

Jan 2026 — May 2026

As an IT Technician, I:

- Diagnosed and resolved hardware, software, and network-related issues across hospital departments.
- Installed, configured, and maintained computer systems, printers, and related peripherals.
- Provided technical support to staff, ensuring minimal downtime and uninterrupted service delivery.
- Assisted in maintaining IT infrastructure and ensuring system security and reliability.
- Participated in software development and technology improvement initiatives.
- Maintained accurate records of technical issues and resolutions.
- Completed professional training programs to enhance technical and troubleshooting skills.

Education

Diploma, Computer Science, Baringo,

Sep 2023 — Dec 2025

Baringo National Polytechnic

Currently finished pursuing a Diploma in Computer Science at Baringo National Polytechnic, where I gained in-depth

knowledge of programming, software development, database management, networking, and systems analysis. My coursework

emphasizes practical problem-solving, teamwork, and project-based learning. I have successfully completed projects involving

web and mobile app development using Python, Flutter, and Java, as well as database design and implementation. This

program have been equipping me with the technical and analytical skills required to contribute effectively to real-world

technology solutions.

Skills
